

Do a Fascinating Show on a New Vision of Life on this Planet!

Fred Glaysher has been a Hit on Over 230 Stations

It's one of today's most compelling topics. Ask your listeners what they think and watch the calls come pouring in. Fred Glaysher tells the truth about modern history and what it means to our nation. A fascinating, **down-to-earth guest**, widely interviewed after 9/11, Glaysher alerts your audience to why we need to change our way of thinking. Expect many calls and even controversy as this expert reveals: Which scourges of the 20th Century...including devastating war, racial upheavals and cultural violence...could now become even worse in the New Millennium without a new global vision that helps people around the world see and feel and understand our common humanity.

What he's learned about the West (and our future) by living on an Arizona Indian reservation...and about East Asia in Japan, India, and China, from being a life-long student of all of the great world religions and wisdom traditions, and a participant and leader in interfaith dialogue.

Fred Glaysher - A Hit on Over 230 Stations 2

Main Points, Questions:

1) A NEW Universal Spiritual Vision of the Oneness of Humanity—global, beyond race and extreme Nationalism—can help reinvigorate modern culture, world civilization, youth, with a sense of a new future, and further the development of a democratic United Nations for the Third Millennium.

2) The modern secular vision of the Enlightenment is insufficient to provide the psychic energy needed to save ourselves at this time of global danger and crisis. Humanity must reconnect with the universal visions of the great spiritual teachers and poets who understood that the cultivation of the inner life of the individual is the way to create inner peace, which can have a positive impact on the outer world and community, deepening the meaning and purpose of life. Far from reverting to any single religious exclusivism that seeks to dominate and control society, humanity needs to achieve, affirm, and shift to a deeper recognition of what is moderate, universal, peaceful, pluralistic, and commonly shared among all of the great spiritual and wisdom traditions, East and West. Quantum Physics, contemporary biology and psychology harmonize with the 200,000 year spiritual history of *Homo sapiens*.

QUESTIONS - All the more pertinent nearly two decades after 9/11, and the return of authoritarian, if not racist and fascist, tendencies.

- 1) Hasn't religion always caused more trouble than it's worth, leading to social upheaval and contention, if not violence? What is religion?
- 2) How can a new universal, spiritual outlook lead to peace? Why do you think it can help?
- 3) Why choose the epic poem as a form in which to speak to humanity?
- 4) How have imaginative stories changed and shaped the world throughout history?
- 5) What does it mean that epic poetry is a unique way of obtaining knowledge?
- 6) Isn't politics a more sensible way of changing the world? More likely to succeed?
- 7) What do you mean that the Enlightenment has become an exclusivism, like the old ones?
- 8) What role has modern Scientism played? How is that different from science?
- 9) How does Quantum Physics intimate a new conception of spirituality? Biology?
- 10) How has modern science transformed the meaning of the old religious ideas and words?
